

M2-Assignment

1. Create a new database (my_EngineeringDatabase).

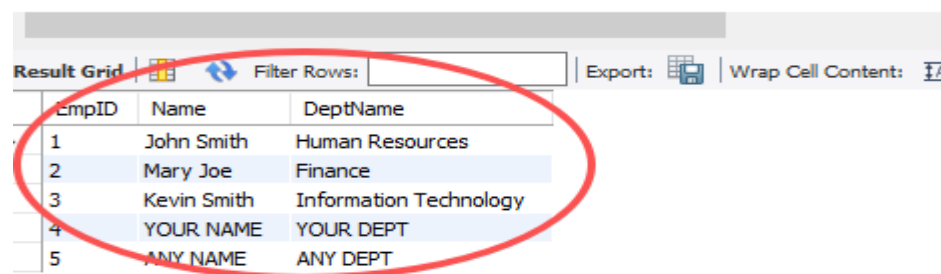

2. Write a script that will create ONE table [Employee]

3. Have your script also insert 5 rows of data into the employee table with the following values:

```
10 • INSERT INTO Employee VALUES
11   ('0001','John Smith','Human Resources');
12 • INSERT INTO Employee VALUES
13   ('00002','Mary Joe','Finance' );
14 • INSERT INTO Employee VALUES
15   ('00003','Kevin Smith','Information Technology');
16 • INSERT INTO Employee VALUES
17   ('00004','YOUR NAME','YOUR DEPT');
18 • INSERT INTO Employee VALUES
19   ('00005','ANY NAME','ANY DEPT');
20 • SELECT * FROM Employee;
```

EmpID	Name	DeptName
1	John Smith	Human Resources
2	Mary Joe	Finance
3	Kevin Smith	Information Technology
4	YOUR NAME	YOUR DEPT
5	ANY NAME	ANY DEPT

4. test_table.sql script

```
1  DROP DATABASE IF EXISTS my_EngineeringDatabase;
2 • CREATE DATABASE my_EngineeringDatabase;
3 • SHOW DATABASES;
4 • USE my_EngineeringDatabase;
5 • CREATE TABLE Employee
6   (EmpID DECIMAL(5,0),
7    Name VARCHAR(30),
8    DeptName varchar(30));
9 • SHOW TABLES;
10 • INSERT INTO Employee VALUES
11   ('0001','John Smith','Human Resources');
12 • INSERT INTO Employee VALUES
13   ('00002','Mary Joe','Finance' );
14 • INSERT INTO Employee VALUES
15   ('00003','Kevin Smith','Information Technology');
16 • INSERT INTO Employee VALUES
17   ('00004','YOUR NAME','YOUR DEPT');
18 • INSERT INTO Employee VALUES
19   ('00005','ANY NAME','ANY DEPT');
20 • SELECT * FROM Employee;
```
